On Safety

The "double-routed protection rope", which is unique in Europe, guarantees absolute safety for our guests.

Safety for our customers

Explore your personal boundaries in an absolutely safe and natural environment.

We guarantee this through the following:

- Equipment with an individually adjusted climbing set and helmet.
- Two independent safety ropes for karabiner and rope pulley protection.
- Detailed instructions for the safety devices.
- Detailed information on the area and the rules.
- Constant visual check by certified high ropes course guides.

Attention!

- Please wear solid shoes and comfortable clothes!
- Children under 16 can only climb when accompanied by an adult.

The highest standards

The Anif Forest Lake Tree-Climbing Park was built by the kletterpark.com company in accordance with the highest safety standards (Austrian industry standard for building and operating high ropes courses ERCA and EN 15567-1 and 2). We only used domestic types of wood and weatherpoof and UV-resistant steel cables and perlon lines.
Thanks to a special clamping technique, no trees were damaged or drilled for the construction of the platforms and stations. Therefore, the naturalnes" of our beautiful mixed forest remains preserved. In addition, the tree-climbing park is inspected by forestrxy officials and civil engineers every year!
